

## Questions

1. What was the main objective of this umbrella review?
  - a) To develop new interventions for CP
  - b) To evaluate inpatient rehabilitation in adults
  - c) To summarize systematic reviews of inpatient paediatric neurorehabilitation during the subacute period
  - d) To compare inpatient vs outpatient care
  - e) To study only traumatic brain injuries
  
2. How many total papers were initially identified in the electronic search?
  - a) 447
  - b) 1,250
  - c) 1,462
  - d) 2,112
  
3. What was the main reason for exclusion of most studies?
  - a) Lack of full text
  - b) Interventions not within 6 months of injury or in outpatient settings
  - c) Wrong patient age group
  - d) Poor translation quality
  
4. Which tool was planned for assessing the quality of systematic reviews?
  - a) PRISMA
  - b) AMSTAR 2
  - c) GRADE
  - d) CONSORT
  
5. Which tool was used to assess risk of bias in systematic reviews?
  - a) ROBINS-I
  - b) ROBIS
  - c) Cochrane RoB2
  - d) CASP
  
6. The ICF-Y framework emphasizes:
  - a) Only physical rehabilitation
  - b) Optimization of overall functioning and participation
  - c) Developing new pharmacological treatments
  - d) Adult rehabilitation
  
7. Children's neurorehabilitation goals differ from adults because they focus on minimizing disruption to development.
  - a) TRUE
  - b) FALSE
  
8. What type of review was this study?
  - a) Narrative review
  - b) Scoping review
  - c) Umbrella review
  - d) Randomized controlled trial
  
9. The review timeframe included studies published since:
  - a) 1980
  - b) 1990
  - c) 2000
  - d) 2010

10. According to the article, what proportion of inpatient paediatric rehabilitation admissions in Australasia were neurological injuries?
  - a) 31%
  - b) 51%
  - c) 71%
  - d) 91%
  
11. What was one major limitation of this review?
  - a) Too few reviewers
  - b) Exclusion of outpatient and online interventions
  - c) Poor statistical analysis
  - d) No access to PubMed
  
12. The review noted that paediatric neurorehabilitation is a:
  - a) Low-complexity, high-volume field
  - b) High-complexity, low-volume field
  - c) High-volume, well-funded field
  - d) Low-complexity, high-evidence field
  
13. The authors identified international collaboration as essential for improving research and consistency.
  - a) TRUE
  - b) FALSE
  
14. What was one exclusion criterion related to patients' medical status?
  - a) Exclusion of patients medically stable
  - b) Exclusion of patients in intensive care who were not yet stable
  - c) Exclusion of patients with mild conditions
  - d) Exclusion of patients under 10 years old
  
15. Which WHO framework was highlighted as valuable for structuring paediatric rehabilitation?
  - a) ICD-11
  - b) ICF-Y
  - c) DSM-5
  - d) WHODAS
